Item 1.

Tumbu would like to grow paddy rice in Mende subcounty. Paddy rice is well known to give good yields when grown in water logged areas. He has two plots where he has picked soil samples **A** and **B** as presented to you.

Task;

Carryout a scientific investigation on the samples provided and thereafter give a recommendation to Mr. Tumbu on which plot he should carry out his project.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Item 2

Mr. Alex deals in beef animal products for income of his home in Mitooma District. Recently, he travelled to the city and left instructions to his employees to slaughter the animal he left at home and get the products for sale. After 4 days, he returned home and found products **C** and **D** as presented to you.

Task;

Observe each specimen and write a report to Mr. Alex about the condition of each specimen, what caused the conditions and recommend measures of how to control the conditions.
